

# The 2015 market for lighting fixtures in Europe: growth and market sizes

*“In Western Europe, consume of lighting fixtures increased by +7.2% in 2015. However, almost hundred percent of that growth can be explained by the increased import of both lighting fixtures and, especially, components.”*

*“Poland by itself accounts for 43% of the lighting consumption of the entire Central and Eastern Europe, which as a whole grew by 14.4%.”*
